

# APRIL

"April showers bring May flowers!"

We hope that everyone had a blessed Easter. We have spent many cold days indoors and will be excited to spend more time outside. Our children strengthen growing muscles when they are climbing, running, and jumping.

In the month of April, the children will be learning about flowers and growing, and the colors all around us. One thing parents can do is take the time to point out all of these wondrous miracles God shows us in everyday life. You will be helping them expand their language, communication skills, and help them to be eager learners.

Earth day is April 22nd. We will be discussing how to make our planet a happy place. We will talk about the importance of recycling, conserving water and electricity, and planting flowers. We will be going on an outdoor Earth scavenger hunt, arts and crafts, and we will also be planting a small garden. The children will understand how things grow, as well as the importance of plants. Plants are the backbone of all life on Earth. By setting this example, we hope our children will continue to have a great place to grow up.

In addition to these activities, we will continue to learn our letters and numbers and include activities that promote recognition. Parents may work at home with children as well.

As a reminder, we ask that all toys from home be kept out of the classroom. We do not want toys to be lost or damaged and they provide a distraction to others.

Thank you and we look forward to an exciting Spring!
