

DOWN ON THE FARM

The month of May is farming month in the Preschool 1 class! The children will learn that farms are where our vegetables are grown and the animals are raised that provide us with milk products and meats.

We will be planting some vegetable in the garden outside our classroom and “milking” a cow!

During this unit, we will also be focusing on listening comprehension by retelling and acting out stories. Our fine motor concentration will be scissor skills. The children will start by snipping strips of paper to make hay for our stuffed animals’ beds and then move on the using safety scissor to cut larger pieces of paper.

Friday May 11th is our Mother’s Day Tea. It will begin at 3:00pm. The children will be making bread, butter, jam and tea for the event! I hope all our mothers will be able to attend.

If you have any farm animals or equipment you would like to bring to school for the children to see or in any way feel you can contribute to the success for our farming unit, please let me know.

Sally, Tracy and Maddy
